

REVOLT ENGAGE

Lead to Retail — Customer Journey Flows

Every trigger, every timing, every channel, every next step — behavioural and time-based logic merged into a single flow per journey

Prepared for review and development handoff

How to Read This Deck

Every journey uses the same four building blocks, and every message is colour-coded by channel.

GOAL

The business outcome this journey exists to drive

ENTRY EVENT

The system or behavioural event that starts the journey

TRIGGER

The condition checked at each step — elapsed time, an action, or whichever comes first

CONVERSION EVENT

The event that ends the journey successfully

Channel Colour Key

WhatsApp

SMS

RCS

Email

Push

AI Call

Human Task

A step's timing is written as 'Day N, or immediately on [event] — whichever comes first.' This means the day-count is a ceiling, not a delay: real behaviour always pre-empts the scheduled touch.

Segmentation & Scoring Model

Every website action fires an event; points accumulate; the cumulative score assigns a bucket.

WARM

5–25 pts

One meaningful action — a product page visit, a scroll, a video watched.

HOT

26–55 pts

Two or more meaningful actions — return visit, dealer locator, EMI calculator.

HOTTEST

56+ pts or instant flag

Done the math, found the dealer, circling the booking page, or returned within 48h.

Highest-Value Scoring Events

- **Booking page viewed** 22 pts — instant Hottest flag
- **EMI calculator used** 20 pts — instant Hottest flag
- **Return visit / dealer locator opened** 15 pts each
- **Test ride page viewed** 18 pts — instant Hottest flag
- **Savings calculator used** 12 pts — instant Hottest flag
- **Product page viewed 3rd+ time** 15 pts

Score decay: full score retained 0–20 days · drops 30% at 21–45 days · resets to 0 at 46+ days. Any instant-flag event overrides the cumulative score immediately, regardless of current bucket. These events originate on the website/app tracking layer, not the CRM — see the Event Dictionary for the full source breakdown.

Event Dictionary

Every trigger used in this deck, grouped by which system actually originates it.

WEBSITE / APP BEHAVIOURAL EVENTS

Website/app tracking layer — not the CRM

- Booking Page Viewed — 22 pts, instant Hottest flag
- Test Ride Page Viewed — 18 pts, instant Hottest flag (+ revisit variant, used in WARM and No-Show as an early-fire trigger)
- EMI Calculator Used — 20 pts, instant Hottest flag
- Savings Calculator Used — 12 pts, instant Hottest flag
- Dealer Locator Opened — 15 pts, promotes WARM → HOT
- Return Visit — 15 pts, fires a HOT message early
- Product Page Viewed 3rd+ time — 15 pts
- Financing/Warranty Page View — triggers the Post-Ride EMI-pivot email early
- Renewed Site Activity (generic) — the Lost Leads override trigger

MESSAGING ENGAGEMENT STATES

From the WhatsApp channel itself

- Delivered
- Read
- Read, no click
- Clicked
- Replied

LIFECYCLE / STATUS EVENTS

System of record: LeadSquared (LSQ)

- Lead Filled
- Lead Scored WARM / HOT / HOTTEST
- Test Ride Booked / Scheduled
- Test Ride Completed
- No-Show Marked
- Booking Started, Not Completed — drives the Abandonment insert
- Booking Created
- Retail Completed

CALL OUTCOME EVENTS

From the calling layer

- Answered
- No Answer
- Confirms
- Reschedules
- Objection Handled

The behavioural layer feeds LSQ once a session is tied to a known lead — LSQ then holds the resulting status and score as the single CRM source of truth, but does not itself originate the raw website/app events.

WARM — Lead to Test Ride Booking

Nurture first, build rapport — 5–25 pts. Scheduled cadence and behavioural triggers merged into one flow.

Step	Timing	Trigger	Channel	What Happens
1	Within 2 hrs of lead fill	Lead Filled	WhatsApp + SMS fallback	Spec sheet + range card, soft opener. SMS fallback if undelivered.
2	Day 2	Step 1 sent	Email	Full specs, EMI table, CTA: savings calculator. Clicks calculator → promote to HOT track.
3	Day 4, or immediately on EMI Calculator Used (Event, 20 pts)	Whichever comes first	WhatsApp	Petrol-cost comparison + savings math. Engages → promote to HOT; no action → Step 4.
4	Day 7, or immediately on Test Ride Page Viewed (Event, 18 pts)	Whichever comes first	AI Call	Outbound call, ask city, offer to book a 20-min slot now. Qualifies → exit to Pre-Ride journey; no answer → Step 5.
5	Day 10	Step 4 no answer	Email	“Revolt vs Splendor vs Activa” comparison content. Clicks → books test ride (exit); no action → Step 6.
6	Day 14, Final	Step 5 no action	WhatsApp	“Reply CALL for a Revolt expert.” No reply → park, score resets Day 45, re-enters WARM.
6b	On reply	Lead replies CALL	Human Task	Callback task auto-created, routed to the nearest dealership advisor queue — SLA: contact within 4 business hours
—	Any point	Dealer Locator Opened (Event, 15 pts) — pushes score into HOT range	—	Instant promotion to HOT track, skip remaining WARM steps

WARM

Revolt Engage

WARM — Lead to Test Ride Booking — Message Content (1/2)

Every message at every trigger point.

● **WHATSAPP · UTILITY** · WARM-01 · Within 2 hrs

Hi {{customer_name}} 🙌 Thanks for your interest in the Revolt RVX! We've put together a quick spec sheet — range, charging, colours, and performance. 📄 [Spec Sheet Link]. Any questions? Just reply here — we're happy to help!

● **SMS · FALLBACK** · WARM-01-SMS

Your Revolt spec sheet is ready: [link]

● **EMAIL · DAY 2** · WARM-02

Subject: *Everything you need to know about the Revolt RVX*
Range · Charge time · EMI from ₹X,XXX/mo · Colours available. Most people are surprised by the savings — take the calculator for a spin. CTA: View full specs / Calculate your savings.

● **WHATSAPP · UTILITY — DAY 4 OR EMI-CALC TRIGGER** · WARM-03

Hi {{customer_name}} 🙌 Do you know how much you spend on petrol every month? Average petrol bike: ₹2,500–3,500/mo. Revolt RVX: under ₹500. That's ₹2,000–3,000 saved every month — ₹24,000+ a year 🤖. See your exact saving: [Savings Calculator link]

● **AI CALL** · Day 7 or Test-Ride-Page-Revisit trigger

Opening: *"You haven't had a chance to visit us yet — I can book a free 20-minute test ride at the centre nearest to you right now. What city are you in?"*

Objective: Qualify and book a slot live on the call; if hesitant, ask what questions remain rather than pushing

Escalation: No answer → Day 10 email; qualifies → exits to Pre-Ride confirmation journey

● **EMAIL · DAY 10** · WARM-05

Subject: *Revolt RVX vs Splendor vs Activa — the real comparison*
Monthly fuel cost · maintenance/yr · 3-year total ownership cost, side by side. The numbers almost always surprise people. CTA: Book a free test ride — 20 mins, no commitment.

WARM — Lead to Test Ride Booking — Message Content (2/2)

● WHATSAPP · UTILITY — DAY 14, FINAL · WARM-06

Hi {{customer_name}} 🙌 We completely understand — a vehicle purchase takes time. If you'd like to speak with a Revolt expert before deciding, just reply CALL. Or book a test ride at your own pace: [link]. No pressure. Take your time 🙏

● HUMAN TASK — ON 'CALL' REPLY · WARM-CALLBACK-01

Callback task auto-created in CRM, assigned to the nearest dealership advisor queue. SLA: contact within 4 business hours. Not an AI call — the lead explicitly asked for a person.

HOT — Lead to Test Ride Booking

Activate, remove the last objection — 26–55 pts.

Step	Timing	Trigger	Channel	What Happens
1	Immediately on lead fill/promotion	Lead scored HOT	AI Call	Confirm slot right now, ask city. Books on call → exit to Pre-Ride journey; no answer → Step 2.
2	30 min after missed call	Step 1 no answer	WhatsApp	Slots available near you this week, pick a time. Clicks → books (exit); no action → Step 3. Read-no-click → flag hesitant, softens Step 5's tone.
3	Day 2	Step 2 no action	Email	EMI breakdown, savings vs petrol, comparison. Clicks → books (exit); no action → Step 4.
4	Day 5, or immediately on Return Visit (Event, 15 pts)	Whichever comes first	WhatsApp	“Revolt owners near you saved ₹X last month.” Clicks → books (exit); no action → Step 5.
5	Day 7, 2nd attempt	Step 4 no action	AI Call	Objection-handling tone, softer if Step 2 showed read-no-click. Objection handled → books (exit); no answer → Step 6.
6	Day 10, Final	Step 5 no answer	Email	Testimonials + objections answered. Clicks → books (exit); no response → park, 45-day retarget.
—	Any point	Booking Page Viewed (Event, 22 pts) — instant Hottest flag	—	Instant promotion to HOTTEST track, skip remaining HOT steps

HOT — Lead to Test Ride Booking — Message Content

Every message at every trigger point.

● **AI CALL** · Immediately on lead fill

Opening: “Hi {{customer_name}}, you just requested a test ride on Revolt.in — I can confirm your slot right now. What city are you in? I'll find the nearest experience centre and lock in a time for you.”

Objective: Book live on the call

Escalation: No answer → WhatsApp 30 minutes later

● **WHATSAPP · UTILITY — 30 MIN POST-MISS** · HOT-02

Hi 🙌 We just tried calling to confirm your test ride slot. Slots are available near you this week — pick a time: [link]

● **EMAIL · DAY 2** · HOT-03

Subject: The numbers make sense — here's why now is the right time for the RVX
EMI from ₹X,XXX/mo · Save ₹2,000–3,000/mo vs petrol · ₹X,XXX saved in Year 1. Most people are surprised — the RVX costs less per month than what they spend on fuel.
CTA: Book your test ride / Run the savings calculator.

● **WHATSAPP · UTILITY — DAY 5 OR RETURN-VISIT TRIGGER** · HOT-04

Hi {{customer_name}} 🙌 Revolt owners near you saved ₹X last month on fuel. Want to see if it works for you? [Savings Calculator link] — or ready to take one for a spin? [Book a test ride]

● **AI CALL** · Day 7, 2nd attempt

Opening: “Hi {{customer_name}}, calling from Revolt again — is there anything stopping you from booking your test ride?”

Objective: Objection-handling: price → walk through EMI; too busy → offer a weekend slot; not sure → answer questions directly

Escalation: No answer → Day 10 final email

● **EMAIL · DAY 10, FINAL** · HOT-06

Subject: Still thinking? Here's what [City] Revolt owners say
2–3 short owner testimonials from the same city.
Objections addressed: range anxiety, home charging, resale value. CTA: Book a free test ride / Chat with us on WhatsApp.

HOTTEST — Lead to Test Ride Booking

Strike immediately, every hour matters — 56+ pts or any instant flag.

Step	Timing	Trigger	Channel	What Happens
1	Immediately on lead fill/promotion	Lead scored HOTTEST	AI Call	Confirm slot right now, ask city. Confirms → exit to Pre-Ride journey; no answer → Step 2.
2	30 min after missed call	Step 1 no answer	WhatsApp	Slots open near you, reply YES for callback. Clicks → books (exit); read-no-click within 1hr → flags hesitant, softens Step 3's opener; no reply 2hrs → Step 3.
2b	On reply	Lead replies YES	Human Task	Callback task auto-created, top of the HOTTEST advisor queue — SLA: contact within 1 business hour, highest priority tier
3	Day 2 AM, 2nd attempt	Step 2 no reply	AI Call	Offer 2–3 specific time options. Confirms → exit; no answer → Step 4.
4	Day 2 PM	Step 3 no answer	WhatsApp	Social proof video, “your slot is still open.” Clicks → books (exit); no action → Step 5.
5	Day 4	Step 4 no action	Email	Experience centre walkthrough, logistics support. Confirm CTA → exit; no action → Step 6.
6	Day 7, Final	Step 5 no action	AI Call	Last chance, low-pressure. Confirms → exit; no answer → demote to HOT track.

HOTTEST — Lead to Test Ride Booking — Message Content (1/2)

Every message at every trigger point.

● **AI CALL** · Immediately on lead fill

Opening: “Hi {{customer_name}}, you just booked a test ride on Revolt.in — I'm calling to confirm your slot right now! What city are you in? I'll lock in the nearest centre.”

Objective: Confirm live, no selling needed — warm, fast, action-oriented

Escalation: No answer → WhatsApp 30 minutes later

● **WHATSAPP · UTILITY — 30 MIN POST-MISS** · HOTTEST-02

Hi {{customer_name}}, we just tried calling to confirm your Revolt test ride. Slots are open near you this week — pick a time: [link]. Reply YES to get a call back.

● **HUMAN TASK — ON 'YES' REPLY** · HOTTEST-CALLBACK-01

Callback task auto-created, top of the HOTTEST advisor queue. SLA: contact within 1 business hour — the highest-priority human task tier in the system.

● **AI CALL** · Day 2 AM, 2nd attempt

Opening: “Hi {{customer_name}}, calling again from Revolt to confirm your test ride slot. I have openings at the nearest centre this week — shall I book one for you right now?”

Objective: Offer 2–3 specific times to reduce friction; if hesitant, mention it's a 20-min experience, no pressure

Escalation: No answer → WhatsApp same evening

● **WHATSAPP · UTILITY — DAY 2 PM** · HOTTEST-04

See what the first ride feels like 📺 [short video] — your slot is still open: [link]

● **EMAIL · DAY 4** · HOTTEST-05

Subject: *Your Revolt test ride is 20 minutes away*
Walk-through of the experience centre — what to bring, how to get there, what happens during the ride. Removes the logistics friction that causes silent drop-off. CTA: Confirm my slot (primary) + contact number (secondary).

HOTTEST — Lead to Test Ride Booking — Message Content (2/2)

AI CALL · Day 7, Final

Opening: *"Hi {{customer_name}}, last call from Revolt — I have a slot open at the nearest centre. Shall I confirm it for you right now? Just say yes."*

Objective: No hard sell, offer to help with scheduling or answer questions

Escalation: No answer → demote to HOT track immediately

Pre-Ride Confirmation

Ensuring show-up — already event-relative, the least in need of change.

Step	Timing	Trigger	Channel	What Happens
1	Immediately on booking confirmed	Test Ride Booked	WhatsApp	Confirmation — date, time, centre, Maps link.
2	Day before the ride	—	WhatsApp	Reminder — tomorrow at [Time], [Centre].
3	3 hrs before	—	AI Call	Quick confirmation, offer to reschedule if needed. Confirms → ride happens; needs reschedule → re-book on call, sequence resets.
4	1 hr before	—	WhatsApp	Final nudge with directions, pure logistics support.
—	Outcome	Ride completed vs. missed	—	Completed → exit to Post-Ride journey; no-show → exit to No-Show Re-engagement journey

Pre-Ride Confirmation — Message Content

Every message at every trigger point.

● WHATSAPP · UTILITY · PRERIDE-01 · Immediate

Your Revolt test ride is confirmed! 🚲
[Date] · [Time] · [Centre Name]
📍 [Google Maps link]

● WHATSAPP · UTILITY · PRERIDE-02 · Day before

Reminder: Your Revolt test ride is tomorrow at [Time] at [Centre]. See you there!
📍 [Maps link]

● AI CALL · 3 hrs before

Opening: “Hi {{customer_name}}, just confirming your test ride at [Centre] today at [Time] — are you all set?”

Objective: Quick confirmation; if reschedule needed, capture a new slot live on the call

Escalation: No answer → WhatsApp 1 hour before, as scheduled

● WHATSAPP · UTILITY · PRERIDE-04 · 1 hr before

You're 1 hour away from your Revolt test ride! 🚲 Here's how to get there: [Maps link]. See you soon!

No-Show Re-Engagement

30-day recovery window — renewed intent now pre-empts the schedule.

Step	Timing	Trigger	Channel	What Happens
1	Same day, 2 hrs after missed slot	No-Show marked	AI Call	Empathetic, zero pressure, immediate reschedule offer. Reschedules → exit to Pre-Ride journey; no answer → Step 2.
2	Same day evening	Step 1 no answer	WhatsApp	Casual reschedule offer + link.
3	Day 3, or immediately on Test Ride Page Revisit (Event)	Whichever comes first	WhatsApp	Social proof video, soft re-entry — no reschedule push, let the video do the work.
4	Day 7, 2nd attempt	Step 3 no action	AI Call	Offer 2–3 specific time options, low friction.
5	Day 10	Step 4 no answer	Email	“What to expect” walkthrough — removes anxiety that causes silent drop-off.
6	Day 15	Step 5 no action	WhatsApp	Genuine slot-scarcity nudge, only if slots are actually limited.
7	Day 21, Final	Step 6 no action	AI Call	Low-pressure, leave the door open. Reschedule at any point → Pre-Ride journey resets; no response by Day 30 → exit to Lost Leads.

No-Show Re-Engagement — Message Content (1/2)

Every message at every trigger point.

● **AI CALL** · Same day, +2 hrs

Opening: “Hi {{customer_name}}, we had a test ride slot for you today — looks like you couldn't make it. No worries — can I find you another time this week?”

Objective: Understanding tone, not disappointed; immediate reschedule offer

Escalation: No answer → WhatsApp same evening

● **WHATSAPP · UTILITY** · NOSHOW-02 · Same day evening

Missed your Revolt test ride today? No worries — slots are still open near you. Pick a new time: [link]

● **WHATSAPP · UTILITY — DAY 3 OR REVISIT TRIGGER** · NOSHOW-03

See what other riders felt on their first Revolt test ride 🎥 [short video]. Your slot is still waiting — [link]

● **AI CALL** · Day 7, 2nd attempt

Opening: “Hi {{customer_name}}, calling again from Revolt — happy to find you a new slot anytime this week. Shall I book one right now?”

Objective: Offer 2–3 specific time options to lower friction

Escalation: No answer → Day 10 email

● **EMAIL · DAY 10** · NOSHOW-05

Subject: Here's what to expect at your Revolt test ride
Walk-through of the experience — what happens, how long, what you'll ride. Goal: remove anxiety about the unknown. CTA: Pick a slot near you.

● **WHATSAPP · UTILITY — DAY 15** · NOSHOW-06

Limited weekend slots open near you this week — want to lock one in before they fill up? [link]

No-Show Re-Engagement — Message Content (2/2)

● AI CALL · Day 21, Final

Opening: *"Hi {{customer_name}}, last call from Revolt — happy to book you in anytime. Just say the word and I'll sort it right now."*

Objective: No hard sell, leave the door open, end on a positive note

Escalation: Declines or no answer → exit to Lost Leads at Day 30

Post-Ride → Booking

Single track for all test ride completers — the AI call reads sentiment live and adapts tone.

Post-Ride → Booking — Message Content (1/2)

Includes the Booking Abandonment insert — previously uncovered ground.

● **AI CALL** · Within 2 hrs of ride completion

Opening: “Hi {{customer_name}}, how was your Revolt test ride today?”

Objective: Gauge sentiment first, then adapt — loved it: “Glad to hear it! I can block a unit for you today, shall we sort the booking now?” Concerns: “Happy to answer anything, what’s on your mind?” Disappointed: listen first, don’t defend.

Escalation: No booking on call → WhatsApp same evening

● **WHATSAPP · UTILITY — SAME DAY EVENING** · POSTRIDE-02

Thanks for riding with us today 🙌 Here’s how easy it is to make it yours — EMI from ₹X,XXX/mo · Booking amount: ₹X,XXX · Delivery in [X] weeks. Any questions? Just reply here.

● **EMAIL · DAY 2 OR FINANCING-VIEW TRIGGER** · POSTRIDE-03

Subject: *Your Revolt is ready to be booked*
Unit availability in your city · Colour options · Delivery ETA
· What’s included. Total cost of ownership vs petrol — 3-year numbers. CTA: Book Now / Call Us.

● **WHATSAPP · UTILITY — DAY 5** · POSTRIDE-05

Hi {{customer_name}}, I have a unit available in [Colour] for [City] — shall I block it for you today? I can walk you through the booking in 5 minutes.

● **EMAIL · DAY 10, FINAL** · POSTRIDE-07

Subject: *Still thinking? Here’s what [City] Revolt owners say*
Owner testimonials, cost comparison vs petrol, total savings in Year 1. One last CTA: Book now / Call us.

● **WHATSAPP · UTILITY — ABANDONMENT, +30 MIN** · ABANDON-01

Hi {{customer_name}}, your booking for the Revolt RVX is still pending. Complete your booking to continue: [link]

Post-Ride → Booking — Message Content (2/2)

● **AI CALL** · Abandonment objection call, +24h

Opening: “Hi {{customer_name}}, I saw your Revolt booking is still pending — is there anything I can help with?”

Objective: Live objection handling before the lead goes cold

Escalation: Unresolved → hands off to a human callback task, not another automated attempt

● **HUMAN TASK — +48H, AI CALL UNRESOLVED** · ABANDON-CALLBACK-01

Callback task assigned to a sales advisor. SLA: same-day contact. The AI call already tried and surfaced a real objection — this needs a person, not a retry.

Post-Ride Drop-Off Re-Engagement

For completers who didn't book within 14 days — they rode the bike, intent is real. Give space, then re-engage gently.

Step	Timing	Trigger	Channel	What Happens
1	Day 3, first re-touch	14-day mark passed	WhatsApp	Pure relationship, no booking ask — “any questions I can answer?”
2	Day 7	Step 1 sent	Email	Owner stories 6 months in — social proof from the same city.
3	Day 10	Step 2 sent	AI Call	“Is there anything specific holding you back — financing, availability, or timing?”
4	Day 15	Step 3 sent	WhatsApp	Incentive surfacing if available — exchange offer, EMI scheme, referral credit, new colour launch.
5	Day 20	Step 4 sent	Email	3-year cost comparison — fuel, servicing, insurance, EMI. For analytical buyers who need the numbers.
6	Day 25	Step 5 sent	AI Call	Gracious final attempt — “completely understand if the timing isn't right.”
7	Day 30, Final	Step 6 sent	WhatsApp	“We'll give you some space — reach out whenever you're ready.” Books at any step → exit to Booking→Retail; no booking by Day 30 → exit to Lost Leads (separate long-tail, no re-entry to WARM/HOT/HOTTEST).

Post-Ride Drop-Off Re-Engagement — Message Content (1/2)

Every message at every trigger point.

● WHATSAPP · UTILITY — DAY 3 · DROPOFF-01

Hi {{customer_name}}, just checking in — any questions I can answer about the RVX? Happy to help whenever you're ready.

● EMAIL · DAY 7 · DROPOFF-02

Subject: *What [City] Revolt owners are saying 6 months in*
2–3 short owner stories: range in daily commute, home charging setup, fuel savings. Matched to the lead's city and commute distance where known. Soft CTA: Ready to join them? Book a slot.

● AI CALL · Day 10

Opening: *"Hi {{customer_name}}, just checking in after your test ride. Is there anything specific holding you back — financing, availability, or just timing? Happy to help with any of it."*

Objective: Consultant tone, not salesperson — have objection answers ready: price → EMI breakdown; range → real owner data; charging → home setup guide

Escalation: No resolution → Day 15 WhatsApp

● WHATSAPP · UTILITY — DAY 15 · DROPOFF-04

Good news — [exchange offer / new EMI scheme / referral credit] just opened up. Want me to apply it to your booking? Or, slots are still open at your nearest centre — just say the word.

● EMAIL · DAY 20 · DROPOFF-05

Subject: *The real cost of owning a Revolt vs a petrol bike*
Detailed 3-year breakdown: fuel cost, servicing, insurance, EMI vs petrol EMI + fuel. Total savings in Year 1, 2, 3. CTA: Run the calculator / Book a slot / Call us.

● AI CALL · Day 25

Opening: *"Hi {{customer_name}}, last call from Revolt. Completely understand if the timing isn't right — just know we're here when you're ready. Anything I can help with today?"*

Objective: Gracious final attempt, leave the door open, no desperation

Escalation: Books → exit; no response → prepare Day 30 WhatsApp close

Post-Ride Drop-Off Re-Engagement — Message Content (2/2)

WHATSAPP · UTILITY — DAY 30, FINAL · DROPOFF-07

Hi {{customer_name}}, we'll give you some space from here — but whenever you're ready to explore the RVX again, just reach out. 🚗🔧

Booking → Retail

One automated message, now backed by an actual advisor-assignment task — the promise in the text finally has a task behind it.

1

Step	Timing	Trigger	Channel	What Happens
1	Immediately on booking confirmation	Booking Created	WhatsApp	Booking ID, amount paid, advisor follow-up promise.
1b	Immediately, in parallel	Booking Created	Human Task	Advisor-assignment task auto-created in CRM — previously this was a promise in the message with no task behind it. SLA: first contact within 1 business day. Fulfilment through delivery still relies on manual advisor follow-up beyond this point.

Booking → Retail — Message Content

Full content shown for development reference.

 **WHATSAPP · UTILITY** · BOOKING-01 · Immediate

Your Revolt RVX is officially booked! 🎉
Booking ID: #XXXXXXX · Amount Paid: ₹X,XXX

Your dedicated Revolt advisor will be in touch to take care of everything — finance, delivery timeline, and making sure your Revolt reaches you perfectly.

Follow us on Instagram 📸 @revoltmotors

 **HUMAN TASK — IMMEDIATE, PARALLEL TO WA** · BOOKING-ADVISOR-01

Advisor-assignment task auto-created and routed to the dealership team. SLA: first contact within 1 business day. This is what the WA message's 'advisor will be in touch' line is actually backed by.

Lost Leads — Win-Back

Segmented by ageing — 30–60 / 60–90 / 90+ days — with an exit ramp for any renewed intent.

Step	Timing	Trigger	Channel	What Happens
1	30–60 days	Recent Drop-Off — likely a scheduling or life conflict, intent still warm	WA + AI Call	“We saved your slot — want to pick a new time?” Low-pressure, fresh-start tone, no guilt.
1b	After 2 failed AI call attempts	Highest-value band, automation exhausted	Human Task	Manual callback for a recent, high-recency drop-off — this band is closest to conversion and worth a person's time when automation doesn't land.
2	60–90 days	Cooling Off — may have looked at competitors, lost urgency	WA + Email	New colour/variant launch, owner stories, local fuel-savings stat. Re-ignite with news, not a reminder.
3	90+ days	Cold Lead — treat as re-entry, not follow-up	WA + Email + Push	Brand re-entry creative — lifestyle content, city owner community. Does not reference the missed test ride.
—	Any point, any band	Renewed site activity detected	WhatsApp	Immediate override — exits the age-based drip, re-engages on what was actually revisited instead of waiting for the next scheduled band touch.

Lost Leads — Win-Back — Message Content

Every message at every trigger point.

WHATSAPP · UTILITY — 30–60 DAYS · LOST-01 Hi {{customer_name}}, we saved your slot — want to pick a new time? No pressure, just say the word and I'll book it for you.	HUMAN TASK — 30–60 DAYS, AI FAILS X2 · LOST-CALLBACK-01 Manual callback task for the highest-value Lost Leads band. SLA: contact within 2 business days. Automation gets two tries here before it becomes a person's job.	WHATSAPP · UTILITY — 60–90 DAYS · LOST-02 Fuel saved by Revolt owners near you this month: ₹XX,XXX. New colour and variant launches now available — worth another look?
WHATSAPP · UTILITY — 90+ DAYS · LOST-03 Thousands of Revolt owners near you — see what they're saying. [Explore the RVX]	WHATSAPP · UTILITY — RENEWED-SIGNAL OVERRIDE · LOST-REVISIT-01 Hi {{customer_name}}, looks like you're exploring the RVX again — want to pick up where you left off? [test_ride_booking_link]	

Cross-Track Governance Rules

Applies across every journey above — build these once, centrally, not per-track.

System of record	LeadSquared (LSQ) holds lead status, lifecycle transitions, and computed scores. Behavioural events (page views, calculator use) originate on the website/app tracking layer and feed into LSQ once tied to a known lead — see the Event Dictionary for the full breakdown.
Instant-flag override	Booking Page Viewed, EMI Calculator Used, Savings Calculator Used, Test Ride Page Viewed, or (Dealer Locator + return visit within 7 days) each override the cumulative score immediately, regardless of current bucket or in-flight step.
Score decay	Full score retained 0–20 days · drops 30% at 21–45 days · resets to 0 at 46+ days. Recompute on every new session, not just at entry.
Frequency caps by bucket	WARM: 2–3 touches/day · HOT: 3–4/day · HOTTEST: 4–5/day — applies to combined messaging + retargeting ad exposure, not messaging alone.
Pause on conversion	All messaging and retargeting ads pause immediately on Test Ride Booked — across every channel, no exceptions.
Whichever-comes-first logic	Every ‘Day N’ step in this deck is a ceiling, not a delay — the matching behavioural event (where one exists) always fires the step early.
Track promotion is one-directional up, explicit down	WARM → HOT → HOTTEST promotions happen instantly on signal. Demotion (HOTTEST → HOT) only happens on an explicit final-step no-answer, never automatically from score decay alone mid-sequence.

AI Calling Across All Journeys

In-house voice channel — a first-class decision at every stage, not a fallback.

WARM / HOT / HOTTEST	Primary outreach on HOT/HOTTEST entry; objection-handling on non-response; sentiment adapts by bucket urgency
Pre-Ride Confirmation	3-hour-before confirmation call with live reschedule capture
No-Show Re-Engagement	Immediate empathetic recovery call at +2h; low-pressure final attempt at Day 21
Post-Ride → Booking	Live sentiment-read call within 2h of ride completion — tone adapts to reaction in real time
Post-Ride Drop-Off	Objection-surfacing call at Day 10; gracious final attempt at Day 25
Lost Leads	Short AI call paired with WA for the 30–60 day Recent Drop-Off band only

Human Call Tasks Across All Journeys

Where a person, not a bot, is the right channel — and what backs that decision.

Journey / Trigger	Task	SLA	Why Human, Not AI
WARM — replies ‘CALL’ (Day 14)	Callback, nearest dealership advisor queue	4 business hours	Lead explicitly asked to speak with a person
HOTTEST — replies ‘YES’ (+30min)	Callback, top of HOTTEST advisor queue	1 business hour	Highest-intent tier; fastest human response in the system
Post-Ride → Booking — Abandonment, AI call unresolved	Callback, sales advisor	Same day	AI call already tried and surfaced a real objection — needs a person, not a retry
Booking → Retail — immediately on Booking Created	Advisor assignment, dealership team	1 business day	Backs the WA message's ‘advisor will be in touch’ promise, which previously had no task behind it
Lost Leads (30–60 days) — AI call fails twice	Manual callback	2 business days	Highest-value win-back band; automation gets two tries before it becomes a person's job

Every human task is auto-created in CRM at the moment its trigger fires — none of these depend on a person deciding to escalate manually.

Analytics Requirements — Lead to Test Ride

What the data team needs to report, per journey, every reporting cycle.

Journey	Volume	Calls Connected	WhatsApp Read	Emails Opened	Primary Conversion
WARM	Leads (#)	# / %	# / %	# / %	Test Rides Scheduled, # / %
HOT	Leads (#)	# / %	# / %	# / %	Test Rides Scheduled, # / %
HOTTEST	Leads (#)	# / %	# / %	# / %	Test Rides Scheduled, # / % + Human Task SLA Compliance %
Pre-Ride Confirmation	Test Rides Scheduled (#)	# / %	# / %	—	Rides Completed, # / % + Avg. Test Ride Rating (X.X/4)
No-Show Re-Engagement	No-Shows (#)	# / %	# / %	# / %	Reschedule Rate, %

“Calls Connected” and “WhatsApp Read” are reported both as raw counts and as a percentage of that row's Volume — percentage alone hides whether a bucket is shrinking.

Analytics Requirements — Post-Ride to Retail & Win-Back

Same reporting discipline, carried through to the end of the funnel.

Journey	Volume	Calls Connected	WhatsApp Read	Emails Opened	Primary Conversion
Post-Ride → Booking	Test Rides Completed (#)	# / %	# / %	# / %	Booking Completed, # / %
Post-Ride Drop-Off	Re-engaged Leads (#)	# / %	# / %	# / %	Booking Completed, # / %
Booking → Retail	Bookings (#)	—	WA Read Rate, % (benchmark)	—	Retail Conversions, # / % (Retail Rate) · Retails Not Done, # / % (Drop-Off Rate)
Lost Leads (30–60/60–90/90+)	Leads Re-engaged, by band (#)	# / %	# / %	—	Win-Back Rate, % · Renewed-Signal Overrides Fired, #

Definitions: WA Read Rate benchmarks reach of the Day-0 booking confirmation. Retail Rate = bookings converting to completed retail within 30 days. Drop-Off Rate = bookings not converting within that 30-day cycle. Human Task SLA Compliance (all journeys): % of tasks contacted within their stated SLA window — report alongside call/message metrics, not separately.

Next Steps

- Confirm event-tracking coverage for every instant-flag and scoring event listed — nothing in this deck works without them firing reliably
- Build the cross-track governance rules (score decay, frequency caps, pause-on-conversion) centrally, once — not duplicated per journey
- Validate the Booking Abandonment insert in Post-Ride → Booking — this is new coverage, not a resequencing of existing content
- Confirm AI calling scripts against actual call-flow constraints with whoever builds the in-house caller
- Confirm CRM task-assignment logic for every Human Task step — advisor routing, SLA enforcement, and queue ownership need a real owner before build, not just a task type
